CIVIL ENGINEERING PROGRAMME

VISION

To Lead Academics and Research in Civil Engineering Globally.

MISSION

To provide high quality education and make the students as ethical, world class professionals.
To improve the skills of both staff and students with opportunities to innovate and explore knowledge through research projects and consultancy.
To inculcate the feeling of present needs in students and evoke in them a responsibility to serve the society better.

INCEPTION OF CIVIL ENGINEERING AT SRKREC

The Department of Civil Engineering at SRKR Engineering College, Bhimavaram, was established in 1980 and has since become a pillar of academic excellence and applied engineering in Andhra Pradesh, particularly in the coastal region. The department offers a B.Tech. Program in Civil Engineering and an M.Tech. program in Structural Engineering. The National Board of Accreditation (NBA) has accredited the undergraduate program four times for the periods 2002–2007, 2007–2012, 2020–2023, and 2023–2026, a testament to its consistent focus on quality education. The department is known for producing graduates who are technically sound and possess strong interpersonal and professional skills.

The department leads in consultancy services across domains like Structural, Geotechnical, Transportation, and Environmental Engineering, contributing over 80% of the college's total consultancy revenue. It actively promotes research and has established six Centres of Excellence, focusing on water quality and materials research and environmental sustainability through funded projects. The department is recognized as a research centre by both Andhra University and JNTU Kakinada and has a vibrant culture of publications and innovation. With a blend of strong academics, industry interaction, and research focus, the Civil Engineering Department continues to shape future-ready engineers committed to societal impact.

HOD's MESSAGE

Dr. G Sri Bala
Associate Professor and HoD
Department of Civil Engineering
SRKR Engineering College

Greetings!!

The future of Civil Engineering is being transformed by the power of Artificial Intelligence, smart technologies, and data-driven innovations. Today, AI is reshaping the way we plan, design, construct, and manage infrastructure systems. From intelligent water quality monitoring and smart transportation systems to sustainable construction materials and predictive maintenance of structures, modern technologies are enabling engineers to create resilient, efficient, and sustainable solutions for society. As educators and researchers, it is our responsibility to prepare students with not only strong technical knowledge but also digital competencies, innovative thinking, and interdisciplinary skills required for the rapidly evolving world. With this vision, our department continuously strives to integrate emerging technologies such as Artificial Intelligence, Machine Learning, Internet of Things (IoT), Geographic Information Systems (GIS), and smart sensing technologies into teaching, research, and industry-oriented activities. We are proud of the enthusiastic participation of our students and faculty members in research projects, technical events, hackathons, internships, and community engagement initiatives that contribute towards nation-building and sustainable development. I sincerely appreciate the dedication and collective efforts of all faculty members,

students, and the editorial board in bringing out this newsletter successfully. Let us continue to innovate, collaborate, and inspire future engineers to build smarter, greener, and more sustainable infrastructure for generations to come.

EDITORS DESK

“The success of a strong professional depends on how much they bounce up when they hit bottom”

It is indeed my great honour to be an editor of our newsletter and it gives me immense pleasure to publish this issue of volume 6 (issue 1). The editorial team feels highly privileged to highlight the activities and achievements of our department, made possible by the massive work done by the faculty members and students.

Editors

Dr. T Vamsi Nagaraju
Associate Professor of Civil
Dean, Research and Development

Students:

K. Yeshwanth - 23B91A0167
N. Purna Chandrika - 23B91A01B0

The Institution of Engineers (India)

Student Chapter

The Institution of Engineers (India) is a statutory body to promote and advance the engineering and technology, established in 1920 and incorporated by Royal Charter in 1935. It is the largest multi-disciplinary professional body of engineers encompassing fifteen engineering disciplines with a corporate membership of over 2 lakhs, and serving the nation for more than 9 decades. The IEI has its headquarters located in Kolkata with national presence through more than hundred Centres and several Overseas Chapters.

The IE(I) Student chapter of Civil Department, SRKR Engineering College, Bhimavaram, was started in 2006. The student chapter has been regularly arranging lectures from eminent personalities from academia, industry and research on varied topics related to technological developments in Civil Engineering domain.

Faculty Advisor

Er. MSK Chaitanya, Assistant Professor of Civil

AUTONOMOUS

Transformative Learning: Higher Education Driving the SDG Agenda

T Vamsi Nagaraju*

*Dean (Research and Development), SRKR Engineering College, Bhimavaram, India

Sustainable Development Goals (SDGs) The 17 Sustainable Development Goals (SDGs), adopted by all member states of the United Nations in 2015, address a wide spectrum of socio-economic, environmental, and technological challenges. These goals are designed to be universal, applying to every nation worldwide, rather than being limited to countries traditionally categorized as "developing" or "emerging." Significantly, the SDGs broadened the educational scope by incorporating tertiary education alongside primary and secondary education. This inclusion marked a pivotal shift, as higher education had been notably absent from earlier global development frameworks, such as the Millennium Development Goals (MDGs) and the Education for All (EFA) initiative.

SUSTAINABLE DEVELOPMENT GOALS

Source: <https://sdgs.un.org/goals>

Higher education institutions play a crucial role in equipping students with essential skills to support the implementation of the SDGs. These include strategic thinking, design-oriented approaches, social responsibility, problem-solving abilities, foresight, and effective interdisciplinary collaboration. By integrating the SDGs into higher education curricula, future professionals can gain the knowledge, tools, and competencies needed to tackle complex, interconnected global challenges. This approach fosters reciprocal learning across high-, middle-, and low-income countries and promotes both interdisciplinary and multidisciplinary problem solving. For example, to ensure environmentally sustainable construction practices, civil engineering students must understand and incorporate SDG principles into their learning and professional development.

The faculty at SRKREC has made significant contributions to research aligned with the United Nations' Sustainable Development Goals (SDGs), as reflected in their extensive publication record. The most notable focus areas include Goal 3: Good Health and Well-Being with 198 publications, emphasizing advancements in healthcare, well-being, and medical innovation, and Goal 7: Affordable and Clean Energy, with 199 publications addressing critical challenges in renewable energy technologies and sustainable energy solutions. Furthermore, key contributions are evident in Goal 9: Industry, Innovation, and Infrastructure (172 publications), highlighting SRKREC's role in driving innovation, sustainable urbanization, and infrastructure development.

SRKREC diverse and impactful research aligns with global priorities, demonstrating its dedication to advancing sustainability through interdisciplinary studies and practical innovations.

DEPARTMENTAL MILESTONES & QUALITY INITIATIVES

Material Testing Laboratory Secures Prestigious NABL Accreditation

The Civil Engineering Material Testing Laboratory at SRKR Engineering College has officially achieved accreditation from the National Accreditation Board for Testing and Calibration Laboratories (NABL). Assessed in accordance with ISO/IEC 17025:2017 standards, this milestone recognizes the laboratory's technical competence, quality assurance, and global benchmarks in providing accurate and reliable testing services for construction materials, concrete, soil, and rocks.

Department empanelled as Third-Party quality control agency for Bhimavaram Municipality

The Department of Civil Engineering has been empanelled as the official Third-Party Quality Control Agency for Bhimavaram Municipality.

Faculty Research Publications

1. Raju, P., Eregno, F. E., Calay, R. K., Raju, P. A. R. K., & Shaik, T. B. (2026). A smart water quality companion for farmers: predicting canal suitability for aquaculture and livestock using validated machine learning models and web based tool. *Frontiers in Environmental Science*, 14, 1879710. (SCI, IF: 4.4, Q1)

2. Raju, P., Eregno, F. E., Calay, R. K., Raju, P., Chinta, D. P., & Shaik, T. B. (2026). Prediction models for assessment of diurnal and seasonal variation of water quality in a semi-perennial canal applicable for drinking and irrigation water management. *Journal of Environmental Management*, 403, 129170. (SCI, IF: 9.2, Q1)

3. Reddy, R., Raut, A., Nagaraju, T. V., Prasad, C. D., & Sharma, P. (2026). Thermo-mechanical performance and machine learning based prediction of residual strength in laterite GGBS geopolymer composites under cyclic thermal loading. *Discover Materials*. (SCI, IF: 5.8, Q1)

Faculty & Research Achievement

Dr. T. Vamsi Nagaraju Receives Prestigious Research Honors in 2025

Dr. T. Vamsi Nagaraju, Associate Professor and Dean of R&D, was recognized as one of the institution's **Top 3 Research Achievers for the calendar year 2025** during the College Annual Day celebrations, acknowledging his outstanding contributions to advancing the college's research ecosystem, mentoring young researchers, and promoting high-impact research.

Further adding to this achievement, he received the **Wiley Top Cited Article Award 2025** for his research published in *Structural Concrete*. The study integrates advanced machine learning techniques with nonlinear finite element analysis to accurately predict the structural behaviour of double-skin tubular columns under axial loading, reflecting the global impact and scholarly excellence of his research.

Guest Lectures by our Faculty

Dr. G. Sri Bala, Associate Professor and Head of the Department of Civil Engineering, was invited as an **expert speaker** at two prestigious national academic programs, reflecting her expertise in water resources, data analytics, and sustainable civil engineering. On **February 13, 2026**, she delivered an online guest lecture at **Lakhmi Chand Institute of Technology (LCIT), Bilaspur**, on the **application of statistical methods and data analysis tools for processing water monitoring data**.

Subsequently, on **May 6, 2026**, she served as a **keynote resource person** for the online Faculty Development Program "**Renewable and Emerging Applications in Civil Technologies (REACT-2026)**" organized by **Malla Reddy Deemed to be University, Hyderabad**, where she delivered a session on the application of artificial intelligence in sustainable civil engineering, including eco-friendly material optimization, soil salinity prediction, and automated resource mapping.

Dr. T Vamsi Nagaraju delivered Guest Talk at OTR, Orrisa.

This program was organised by CSIR-CRRI, New Delhi.

WORKSHOPS, EXPOS & TECHNICAL EVENTS

Five-Day Product Development Program on Water Quality monitoring using IoT & ML

The Department of Civil Engineering, in association with iHub-Data, IIIT Hyderabad, hosted an intensive five-day Product Development Program (PDP) titled “Smart Sensing and Data Analytics for Water Quality Monitoring using IoT and Machine Learning” from January 27–31, 2026. The sponsored workshop provided rigorous training to researchers, students, and academicians on real-time environmental data acquisition, sensor deployment, and predictive modelling frameworks.

STUDENT ACHIEVEMENTS

Students Win 1st Prize in Concrete Strength Competition at TECHMANIA–2K26

Demonstrating exceptional knowledge of materials engineering, a competitive student team representing SRKR Civil Engineering won the coveted **First Prize** at the **TECHMANIA–2K26** festival, hosted by the **Bonam Venkata Chalamayya Institute of Technology & Science**. The rigorous challenge tested the team's custom mix-design ratio, outperforming alternative specimens in the lightweight concrete compressive resistance trials.

Civil Engineering Teams Take 1st and 2nd Prizes in "Filter Frenzy" Technical Carnival

Our third-year and second-year civil engineering students earned major honors during the 2K26 National **Level Technical Carnival** hosted at **Aditya University** from March 6–7, 2026.

Competing under strict operational deadlines, the third-year student team secured the grand **First Prize** trophy, while the second-year team achieved the Second Prize placement for designing efficient filtration mechanisms.

Students Top the National "Be Lite and Strong" Concrete Cube Challenge

Further cementing their dominant performance at **Aditya University's technical carnival** from March 6–7, 2026, third-year civil engineering students **Chandrika, Venkanna Babu, and Gopal** won the First Prize in the highly competitive **"Be Lite and Strong" Concrete Cube Competition**. The team engineered an innovative light-aggregate specimen capable of managing immense pressure limits while maintaining low density.

SRKR Team Successfully Competes in National Concrete Canoe Competition (January 7–09, 2026)

Displaying incredible engineering creativity, a student cohort from the department built and raced an indigenous vessel at the second annual **Vishnu National Concrete Canoe Competition** held from **January 7–09, 2026**. The multi-day challenge required participants to apply precise principles of fluid buoyancy, aggregate material calculations, and structural analysis to construct a floating concrete canoe that performed exceptionally in open water trials.

M. Tanuja Wins SURE Fellowship at IIT Hyderabad

Third-year civil engineering undergraduate student **M. Tanuja** has achieved national recognition after being selected for the prestigious **Summer Undergraduate Research Exposure (SURE)** Internship Program at the **Indian Institute of Technology (IIT) Hyderabad**. This fellowship gives Tanuja the opportunity to work inside premier laboratories alongside leading structural scientists on advanced engineering research.

Materials Expo 2026 Celebrates National Science Day with Net-Zero Focus

The Sustainability Student Club organized the "Materials Expo 2026" on campus to celebrate National Science Day on February 28, 2026. Aligned closely with the United Nations Sustainable Development Goals (SDGs), the student-led expo showcased green concrete mixtures, carbon-neutral construction techniques, and recycled engineering aggregate materials to educate visitors on reducing the construction sector's environmental impact.

SDG	SDG Title	Expo Activities / Initiatives	Contribution to Sustainable Development
SDG 9	Industry, Innovation and Infrastructure	Demonstration of green concrete mixtures, carbon-neutral construction techniques, and recycled engineering aggregates.	Promoted innovation in sustainable construction materials and encouraged the development of resilient, resource-efficient, and environmentally friendly infrastructure.
SDG 11	Sustainable Cities and Communities	Exhibition of eco-friendly construction materials and sustainable building solutions.	Raised awareness of sustainable construction practices that contribute to environmentally responsible, resilient, and sustainable cities and communities.

Hands-on Skills Enhanced at Advanced Surveying Workshop

Focusing on contemporary geospatial analysis tools, the department successfully completed its multi-day Advanced Surveying Workshop for a cohort of 40 enthusiastic participants from June 2–6, 2026. Guided by certified regional surveying specialists, students engaged in rigorous field training covering topography surveys through Differential GPS (DGPS), contour data collection, Total Station operation, and Data Processing inside open-source QGIS software platforms.

BUILDTECH Expo 2K26 Displays Final-Year Structural Engineering Innovations

Date: 27-04-2026

The BUILDTECH Expo 2K26, organized by the Department of Civil Engineering & AICTE IDEA Lab at SRKR Engineering College, was successfully conducted for the final year civil engineering students.

This one-day expo brought together innovation, sustainability, and practical engineering solutions under one roof. Students showcased a wide range of projects focusing on modern construction techniques, sustainable practices, and real-world civil engineering challenges.

SAMAGRA 2026 Celebrates Technical Presentations and Project Excellence (March 5, 2026)

Fostering healthy academic exchange, the department successfully hosted its landmark symposium, SAMAGRA 2026, on March 5, 2026. Attracting competitive teams from various engineering colleges across the state, the event served as a major creative forum for students to pitch technical papers, build scale models, and engage in cross-disciplinary dialogue regarding current trends in resilient infrastructure.

Faculty Development Program

FDP on “Next Generation Civil Infrastructure: Sensors, ML, and Digital Twin Applications”

25–30 May 2026

This six-day Faculty Development Program provides comprehensive exposure to advanced digital technologies transforming civil infrastructure. Participants gained knowledge of smart sensors, IoT, AI, ML, Digital Twins, and data-driven infrastructure management.

Resource Persons

1. Dr. P. Venkata Dilip – Mahindra University, Hyderabad
2. Dr. Tushar Bansal – KUFPM, Saudi Arabia
3. Dr. G. Sri Bala – SRKREC
4. Dr. N. Sunil – GITAM University, Vizag
5. Dr. G. Ramesh – SR University, Warangal
6. Dr. K. Venkatesh – BIMSaArthi

Collaborations

Department Inks Research Partnership with Proximal SoilSens Technologies

Expanding its industry-academia research collaborations, the department has entered into a structured data-sharing and product development partnership alongside **Dr. Rajul Patkar**, Founder of **Proximal SoilSens Technologies Pvt. Ltd.** The joint venture focuses on **developing advanced aquatic monitoring instruments** and **automated sensing networks** designed to measure early toxicity indicators across commercial aquaculture setups.

TRAINING & PLACEMENT SUCCESS

Civil Engineering Students Achieve Outstanding Placement Success

The Department of Civil Engineering recorded an impressive placement season, with **74 graduating students** securing positions in leading infrastructure and construction companies.

Megha Engineering & Infrastructures Limited (MEIL) recruited **42 students** as Graduate Engineer Trainees (GETs), while **AYATI Constructions and Estates LLP** selected **15 students**, and **NCC Limited** offered Graduate Engineer Trainee positions to **7 students**. Additionally, **Balfour Beatty Construction** recruited **A. Kiran Sai, B. Sai Kiran, and P. Ravikumar**, offering each a **₹5.0 LPA** package, and **UltraTech Cement** selected **T. Kishore Kumar** with a **₹5.0 LPA** offer.

Construction Consortium Ltd. (CCCL) hired **5 students** for Graduate Engineer Trainee roles. **Sri City Private Limited** Recruited **M. Tarun Kumar** with a **₹4.23 LPA** package.

These outstanding placements highlight the department's strong academic training, industry readiness, and the confidence leading organizations place in its graduates.

Field Visit

Students Explore Machilipatnam Sea Port Project (January 8, 2026)

To bridge the gap between classroom theory and real-world construction engineering, the department organized a comprehensive technical field visit to the massive Machilipatnam Sea Port project for second- and third-year students on January 8, 2026. Facilitated directly by senior project managers from MEIL, the students observed ground improvement methods for weak coastal soils, complex marine dredging activities, and the systematic assembly of massive concrete breakwater structures.

ALUMNI CELEBRATIONS & MILESTONES

Alumnus Dr. G. Bharath Spearheads Revolutionary Sustainable CSIR Bio-Bitumen Project

The department extends its warmest congratulations to distinguished alumnus Dr. Bharath Gottumukkala, Principal Scientist at the CSIR–Central Road Research Institute (CSIR-CRRI), New Delhi. Dr. Bharath played a leading role in the successful technology transfer event for “Bio-Bitumen via Pyrolysis: From Farm Residue to Roads,” held on January 7, 2026.

This green innovation converts agricultural field waste into a sustainable substitute for petroleum bitumen, directly addressing national air pollution and green highway construction priorities.

Former Student Pothula Ambedkar Selected as APPSC Group-II Officer

The entire SRKR Civil family joins in celebrating alumnus Mr. Pothula Ambedkar (2019–2023 batch) for successfully qualifying as a Group-II administrative officer through the rigorous Andhra Pradesh Public Service Commission (APPSC) examinations. His achievement highlights his commitment to public welfare and serves as a strong inspiration for current engineering students.

First Graduating Batch (1980–1984) Returns for an Emotional 40-Year Campus Reunion

In an emotional milestone celebration, the historic first graduating class of the Civil Engineering Department returned to the campus four decades after completing their degrees. Walking down the hallways, visiting upgraded laboratories, and interacting with current faculty and student groups, the veteran engineers shared valuable career insights and nostalgic memories, reinforcing the timeless bond of the SRKR family.

Felicitations Ceremony Honors Professor Dr. A. Subhramanyam Raju After 40 Years of Service

The management and faculty organized a grand superannuation celebration honoring Professor and former Head of the Civil Engineering Department (2019–2021), Dr. A. Subhramanyam Raju.

Celebrating over 40 years of teaching excellence, structural engineering research, and leadership, the event thanked Dr. Raju for his foundational contributions that have shaped generations of successful engineering graduates.

UPCOMING EVENTS

SAGI 2026

Pre-conference
workshop on “Next-Gen
Coastal Infrastructure:
Sustainability in Action”,
scheduled on 6th August 2026
