Feedback Analysis 2025-26

A feedback on the curriculum is obtained from students, faculty, parents and alumni. After study of the feedback form various stake holders some important points of the feedback are identified. Total 169 feedback forms have been obtained from various stake holders.

The following are the key points obtained from the study of the feedback:

1. Holistic development of interpersonal and communication skills should be promoted.
2. Students should be trained to explore and understand emerging technologies
3. More practical exposure should be provided to help students relate theory to real-world applications.
4. Increasing syllabus depth to match external and academic standards.
5. Need more focus on quality than quantity..
6. Introduce software course AIML in semester
7. Additional programming courses should be offered as elective subjects
8. The curriculum should be updated to include new and advanced technologies.
