DEPARTMENT OF CIVIL ENGINEERING

"Materials Science to Materials Sustainability"

About the Event

The IGBC of SRKR Engineering College (A), Bhimavaram, in association with the Department of Civil Engineering, organized an interactive technical session titled “Materials Science to Materials Sustainability” on 11th December 2025. The event was conducted to create awareness among students about sustainable and eco-friendly materials and their importance in modern civil engineering. The programme focused on the need for reducing environmental impact and promoting innovative and sustainable practices in the construction industry.

The session covered important topics such as sustainable construction materials, Life Cycle Assessment (LCA), circular economy, carbon footprint reduction, waste utilization, and green construction practices. Students actively participated in the technical discussions and shared their ideas on the use of alternative and eco-friendly materials in construction. The programme helped students understand how innovative material selection and responsible construction practices can contribute to environmentally friendly and sustainable infrastructure.

The event was successfully conducted with active participation from students and faculty members. It encouraged students to develop innovative thinking, environmental awareness, and practical knowledge of sustainable construction practices. The programme concluded with appreciation for the

participation and efforts of the students and faculty, highlighting the importance of integrating sustainability principles into civil engineering education and future construction practice.

Conclusion

The “Materials Science to Materials Sustainability” event successfully created awareness among students about the importance of sustainable materials and eco-friendly practices in civil engineering. The interactive sessions encouraged students to think beyond conventional construction methods and explore innovative approaches such as waste utilization, circular economy, Life Cycle Assessment, and carbon footprint reduction. The programme provided a valuable platform for knowledge sharing, technical discussion, and creative thinking, motivating students to contribute towards the development of greener, resilient, and sustainable infrastructure. Overall, the event effectively promoted the vision of the IGBC by encouraging students to adopt sustainability as an essential part of their future engineering practices.

DEPARTMENT OF CIVIL ENGINEERING

"Soil Health Matters"

World Soil Day

About the Event

The IGBC of SRKR Engineering College (A), Bhimavaram, Andhra Pradesh, organized an expert talk titled “Soil Health Matters” on 5th December 2025, in view of World Soil Day. The half-day programme was conducted from 9:00 AM to 12:00 PM with the objective of creating awareness among students about the importance of soil health, soil conservation, sustainable land management, and the role of soil in supporting agriculture, infrastructure, ecosystems, and human activities. The programme provided an opportunity for students and faculty members to gain practical knowledge about soil-related challenges and the need for responsible management of this valuable natural resource.

The programme commenced at 9:00 AM with the welcome and introduction to the theme of World Soil Day, followed by an overview of the importance of healthy soil in sustainable development. From 9:30 AM to 10:30 AM, the expert session focused on soil health, soil degradation, major causes affecting soil quality, and the importance of scientific land-use practices. From 10:30 AM to 11:30 AM, the session covered various soil conservation practices, sustainable agricultural practices, prevention of soil degradation, and the importance of protecting soil resources for future generations. The participants actively engaged in the session and gained awareness about practical approaches for maintaining and improving soil health. From 11:30 AM to 12:00 PM, an interactive discussion and

question-and-answer session was conducted, allowing students to clarify their doubts and discuss issues related to soil conservation and sustainable land management.

Student Report

To be added.

Conclusion

The event concluded with an interactive discussion and a summary of the key points discussed during the programme. The session helped participants understand the critical importance of soil as a natural resource and encouraged them to adopt responsible and sustainable approaches towards soil management. The programme also created awareness about the consequences of soil degradation and the collective responsibility required to protect soil resources. Overall, the “Soil Health Matters” programme organized by the IGBC served as an informative platform for promoting environmental awareness and encouraging students to contribute towards sustainable soil management and the protection of soil for future generations.
