

SAGI RAMA KRISHNAM RAJU ENGINEERING COLLEGE (AUTONOMOUS)

(Approved by AICTE, New Delhi, Affiliated to JNTUK, Kakinada)

Accredited by NAAC with A+ Grade, Accredited by NBA (UG: Civil, CSE, ECE, EEE, IT & ME)

Recognised as Scientific and Industrial Research Organisation

SRKR Marg, CHINA AMIRAM, BHIMAVARAM-534204, W.G.Dt., A.P., India.

GREEN CAMPUS POLICY

2026

1. Preamble

Sagi Rama Krishnam Raju Engineering College (SRKREC) is committed to creating and maintaining a clean, green, healthy, safe, and sustainable campus. The Institution recognizes its responsibility towards environmental protection, conservation of natural resources, reduction of pollution, climate action, and promotion of environmental awareness among students, faculty, staff, visitors, and the surrounding community.

The Environmental Policy provides a framework for integrating environmental sustainability into the Institution's academic, research, infrastructure, administrative, campus, and outreach activities. The policy draws on the principles of clean and green campus development, resource conservation, waste minimization, renewable energy, water conservation, environmental awareness, and regular environmental auditing reflected in the reference policies provided.

2. Vision

To develop SRKREC as a model sustainable and environmentally responsible campus that promotes responsible use of natural resources, environmental innovation, climate resilience, and sustainable development.

3. Objectives

The Institution shall:

- i. Promote environmental awareness and responsibility among students, faculty, staff, and other stakeholders.
- ii. Maintain a clean, green, healthy, and pollution-free campus.
- iii. Conserve energy, water, biodiversity, and other natural resources.
- iv. Reduce waste generation and promote the 3R principle – Reduce, Reuse and Recycle.
- v. Promote renewable energy and energy-efficient technologies.
- vi. Promote rainwater harvesting, water conservation, and efficient water management.
- vii. Minimize the use of single-use plastics and work towards a plastic-free campus.
- viii. Promote paperless and digital administrative and academic processes.
- ix. Ensure responsible management of solid waste, liquid waste, biomedical/hazardous waste, and e-waste, as applicable.
- x. Promote sustainable transportation and reduce vehicular pollution within the campus.
- xi. Encourage green buildings, sustainable infrastructure, and environmentally responsible procurement.
- xii. Protect and enhance campus greenery, biodiversity, and ecological resources.
- xiii. Integrate sustainability and environmental concerns into teaching, research, innovation, consultancy, and community outreach.
- xiv. Conduct Green Audits, Energy Audits, and Environmental Audits periodically.
- xv. Promote student-led environmental clubs, campaigns, projects, and community initiatives.
- xvi. Encourage research and innovation addressing local and global environmental challenges.

4. Key environmental focus areas

Clean and green campus

SRKREC shall maintain a clean and aesthetically pleasing campus through:

- Regular cleanliness drives.
- Proper placement and maintenance of waste bins.
- Removal of obsolete, broken, and unusable materials.
- Student and staff participation in campus cleanliness activities.
- Cleanliness campaigns through NSS, clubs, departments, and student organizations.
- Special waste-management arrangements during institutional events.
- Periodic awareness campaigns and cleanliness pledges.

The reference Green Campus Policy similarly emphasizes cleanliness drives, awareness rallies, removal of waste materials, annual pledges, and responsible waste management during events.

Landscaping, green cover and biodiversity

The Institution shall:

- Promote extensive plantation of native and suitable tree species.
- Increase green cover and maintain existing trees and landscaped areas.
- Develop green spaces, gardens, shaded areas, and biodiversity zones.
- Encourage tree plantation by students, faculty, alumni, and visitors.
- Avoid unnecessary removal of trees.
- Promote biodiversity awareness and conservation activities.
- Use environmentally responsible landscaping practices.
- Encourage the development of herbal, medicinal, thematic, and educational gardens wherever feasible.

Green landscaping contributes to campus cooling, air-quality improvement, runoff management, recreation, and environmental awareness.

Energy conservation and renewable energy

SRKREC shall promote energy efficiency through:

- Use of LED lighting.
- Energy-efficient electrical and laboratory equipment.
- Automatic controls and sensors for lighting wherever feasible.
- Switching off lights, fans, computers, air conditioners, and other equipment when not required.
- Maximum utilization of natural daylight and ventilation.
- Periodic maintenance of electrical equipment.
- Energy-efficient air-conditioning systems.
- Use of renewable energy sources, particularly solar energy, wherever feasible.
- Installation and expansion of rooftop solar systems based on technical and financial feasibility.
- Monitoring of energy consumption.
- Periodic Energy Audits.

The reference policy includes LED lighting, automatic street-light controls, efficient air-conditioning, natural lighting and ventilation, and energy audits as key energy-conservation measures.

Water conservation and management

The Institution shall promote responsible water use through:

- Rainwater harvesting and groundwater recharge.
- Regular inspection and repair of leaking taps, pipes, tanks, and fixtures.
- Installation of water-efficient fixtures wherever feasible.
- Monitoring of water consumption.
- Reuse of treated wastewater wherever technically feasible.
- Appropriate use of treated water for gardening and landscaping.
- Awareness programmes on water conservation.
- Prevention of water wastage in laboratories, hostels, canteens, and other facilities.
- Periodic assessment of the campus water balance.

Rainwater harvesting is specifically identified in the reference Green Campus Policy as a mechanism for groundwater recharge and water conservation.

Solid waste management

SRKREC shall follow the principles of waste avoidance, reduction, segregation, reuse, recycling, and responsible disposal.

The Institution shall:

- Segregate waste at source.
- Provide appropriate bins at strategic locations.
- Promote the 3Rs – Reduce, Reuse and Recycle.
- Minimize food waste.
- Promote responsible use of packaged food.
- Encourage reuse of usable materials.
- Conduct awareness programmes on waste management.
- Maintain appropriate records of waste generation and disposal.
- Ensure disposal through authorized agencies wherever applicable.

The reference policy emphasizes source-level waste management, the 3Rs, reduction of paper consumption, minimizing food waste, and awareness programmes.

Plastic-free campus

SRKREC shall progressively work towards a single-use plastic-free campus.

The Institution shall:

- Discourage single-use plastic bags, cups, plates, straws, sachets, and bottles.
- Encourage reusable and durable alternatives.
- Promote stainless-steel water bottles, tumblers, and reusable containers.
- Encourage canteens and event organizers to avoid single-use plastics.
- Conduct awareness programmes on plastic pollution.
- Encourage students and staff to promote plastic-free practices in their communities.

The reference Green Campus Policy adopts a plastic-free campus approach and promotes reusable alternatives such as stainless-steel utensils and tumblers.

E-waste management

The Institution shall ensure environmentally responsible management of electronic waste by:

- Maintaining an inventory of electronic equipment.
- Extending the useful life of equipment through appropriate maintenance.
- Repairing and reusing equipment wherever feasible.
- Segregating obsolete electronic equipment.
- Avoiding informal disposal of e-waste.
- Disposing of e-waste through authorized recyclers/agencies.
- Maintaining records of e-waste generated and disposed.
- Promoting awareness about responsible e-waste management.

The reference policy also emphasizes periodic review and responsible disposal/recycling of obsolete computers, hard disks, laboratory equipment, printers, and UPS batteries.

Paperless and digital campus

The Institution shall promote paper conservation through:

- E-governance.
- Digital attendance and academic records.
- Online circulars and notices.
- Digital examination and assessment processes wherever feasible.
- Digital documentation and record management.
- Learning Management Systems and digital learning resources.
- Electronic communication among departments and stakeholders.
- Cloud-based storage wherever appropriate.

The reference policy identifies digitization, electronic communication, cloud storage, and digital learning resources as important measures for reducing paper consumption.

5. Sustainable infrastructure

While planning new buildings, renovations, and infrastructure projects, SRKREC shall consider:

- Energy efficiency.
- Natural lighting and ventilation.
- Solar energy potential.
- Water efficiency.
- Rainwater harvesting.
- Sustainable construction materials.
- Waste minimization during construction.
- Green landscaping.
- Accessibility and user safety.
- Climate resilience.
- Life-cycle cost and environmental impact.

6. Green, energy and environmental audits

SRKREC shall periodically conduct:

- Green Audit
- Energy Audit
- Environmental Audit
- Water Audit, wherever feasible
- Waste Audit, wherever feasible
- Carbon-footprint assessment, wherever feasible

The audits shall be used to:

- Identify resource consumption.
- Identify environmental risks and areas of wastage.
- Measure improvements.
- Develop corrective actions.
- Set sustainability targets.
- Support institutional planning and budgeting.

The reference policy states that Green Audits are conducted to identify, quantify, describe, and prioritize environmental sustainability measures, while Energy Audits help identify energy wastage and opportunities for reduction.

7. Sustainable procurement

The Institution shall, wherever technically and financially feasible:

- Prefer energy-efficient equipment.
- Prefer durable and repairable products.
- Minimize unnecessary packaging.
- Prefer environmentally responsible products.
- Consider life-cycle cost rather than only purchase cost.
- Encourage local sourcing where appropriate.
- Avoid unnecessary single-use materials.

8. Green events and sustainable practices

All major institutional events, conferences, workshops, fests, and meetings shall progressively adopt green-event practices such as:

- Digital invitations and registration.
- Reduced paper usage.
- Reusable name badges and signage wherever feasible.
- Avoidance of single-use plastics.
- Responsible food planning to minimize food waste.
- Reusable or recyclable serving materials.
- Proper waste segregation.
- Efficient energy use.
- Public/pooled transportation.
- Environmental awareness messaging.

9. Research, innovation and community engagement

SRKREC shall encourage research and innovation in:

- Renewable energy.
- Water and wastewater management.
- Sustainable materials.
- Circular economy.
- Waste-to-resource technologies.
- Climate resilience.
- Environmental monitoring.
- Green infrastructure.
- Sustainable transportation.
- Biodiversity conservation.
- Sustainable agriculture and aquaculture.
- Artificial Intelligence and digital technologies for environmental management.

Student and faculty research projects addressing local environmental challenges shall be encouraged through departments, Centres of Excellence, R&D initiatives, clubs, NSS, IIC, and other institutional platforms.

10. Monitoring and performance indicators

The Institution shall progressively monitor indicators such as:

Area	Indicative Performance Indicators
Energy	Electricity consumption, renewable-energy generation, energy-saving measures
Water	Water consumption, rainwater harvested, groundwater recharge, wastewater reused
Waste	Total waste generated, segregated waste, recycled waste, e-waste disposed
Plastic	Reduction in single-use plastic consumption
Green Cover	Number of trees/plants, green area, plantation activities
Transportation	Public/college transport usage, cycling/walking initiatives
Paper	Reduction in paper consumption and digitalization
Audits	Green, Energy and Environmental Audits completed
Awareness	Number of environmental programmes and participants
Research	Sustainability-related projects, publications, patents and innovations
Community	Environmental outreach and community projects

Environmental-conscious management, administration, faculty, and students of the college are aware of the environmental policy and take responsibility for protecting the environment. The college communicates its environmental policy to all stakeholders through the induction programme. The policy is made publicly available on the college website and displayed at prominent places on the campus.
