Benediction

messages...

Dr. Bh.V. S. Rama Krishnam Raju
Professor & Head,
Dept. of Computer Science and Engineering

Dr. P. Ravi Kiran Varma
Professor & Head,
Dept. of Information Technology

“Success is the sum of small efforts,
repeated day in and day out.”

Dear Students,

As you begin this academic journey, remember that excellence in engineering is built not only through technical knowledge, but also through curiosity, discipline, creativity, and the willingness to keep learning. Embrace every opportunity to explore emerging technologies, strengthen your problem-solving abilities, and work collaboratively. Do not be afraid of challenges or failures; they are valuable steps in the learning process. Use your time wisely, maintain academic integrity, and strive to become professionals who combine technical competence with strong communication, ethical responsibility, and empathy. Learn continuously. Think independently. Create responsibly.

*I wish each of you a rewarding
and successful academic journey.*

- Dr. Bh. V. S. Rama Krishnam Raju

“The future belongs to those who
learn, adapt, and create.”

Dear Students,

Information Technology is a field of constant change, where curiosity and continuous learning are essential for growth. As you progress through your academic journey, develop strong technical foundations while cultivating problem-solving skills, creativity, communication, and teamwork. Explore new technologies, learn from challenges, and make the most of every opportunity to apply your knowledge beyond the classroom. Remember that true success lies not merely in mastering technology, but in using it responsibly to create meaningful solutions for society. Think innovatively. Build responsibly.

I wish you a successful academic journey.

- Dr. P. Ravi Kiran Varma

Placement *Milestones*

TCS Charts a Larger Presence in Andhra Pradesh

A major expansion plan by Tata Consultancy Services (TCS) in Andhra Pradesh offered an encouraging glimpse into emerging career opportunities for engineering graduates during a pre-placement talk organised by the Training and Placement Cell. The session featured Ravi Bhavaraju, Head, TCS Visakhapatnam Centre, who said the company was planning to strengthen its presence in the State and create opportunities for around 20,000 people over the next three to five years. He also highlighted TCS initiatives involving educational institutions and government organisations and advised students to strengthen their technical skills in response to rapid technological developments. Emphasising the growing relevance of Artificial Intelligence, he encouraged students to use emerging technologies effectively while developing their own problem-solving abilities. Dr. K. V. Muralikrishnam Raju, Principal, and Dr. K. R. Satyanarayana, Dean, Training and Placement Cell, appreciated TCS's continued association with the college and its recruitment initiatives.

Meritorious Moments

SRKREC Hosts Major State Entrance Examinations

SRKREC strengthened its role as a trusted academic examination centre by hosting several major state-level entrance examinations conducted by the Government of Andhra Pradesh. The college served as a venue for the AP EAMCET on the 2nd of May, AP LAW CET on the 4th of May, and AP EDCET on the 8th of May. Dr. K. V. Murali Krishnam Raju, Principal, stated that the examinations were conducted smoothly with the necessary infrastructure and arrangements in place for candidates. Faculty and administrative personnel coordinated the examination-related responsibilities to ensure an orderly and efficient process. The college's selection as a centre for multiple state-level examinations reflects the strength of its academic infrastructure and its ability to manage large-scale examinations effectively. The initiative also highlights SRKREC's continuing contribution to supporting major educational and competitive examination processes.

Three Students Received Cash Awards for Academic Excellence

A helping hand from the alumni community gave fresh encouragement to deserving students pursuing engineering education. As part of an academic support initiative, three students received cash awards of 25,000 each for their performance in their respective programmes. The support was extended by an alumnus from the 1995 EEE batch, who has been working in the software sector in the United States. The initiative was appreciated by Sri S. V. Ranga Raju, Vice President, Dr. M. Jagapathi Raju, Director, and Dr. K. V. Murali Krishnam Raju, Principal, who noted the value of extending financial assistance to students in need. The programme encouraged students to pursue academic excellence without allowing financial constraints to hinder their educational aspirations.

SRKR ALUMNI

Alumni Support SRKREC's Development Initiatives

The spirit of giving back to their alma mater was evident as the 1997–2001 batch of Mechanical Engineering alumni of Sagi Rama Krishnam Raju Engineering College came together to support the institution's development initiatives. The alumni presented their contribution to the college during a reunion programme organised on the campus. Dr. K. V. Murali Krishnam Raju, Principal, appreciated the former students for their continued association with the institution and their commitment to supporting its progress. The programme also provided an opportunity for the alumni to reconnect with their former institution, faculty members and fellow students. Faculty members and representatives of the SRKREC Alumni Association participated in the event and expressed their appreciation for the alumni's contribution. The initiative reflected the enduring bond between SRKREC and its alumni and highlighted the role of former students in contributing to the continued development of their alma mater.

Activities

Students Urged to Prioritise Mental Well-being

A healthy balance between academic responsibilities and personal well-being was emphasised at an awareness programme on the 7th of May. The Women Empowerment Cell, in association with the Femina Lions Club, organised the programme to promote mental and physical wellness among students. Health experts highlighted the impact of academic pressure, inadequate physical activity and limited social interaction on students' emotional well-being. They encouraged students to incorporate exercise, yoga, recreation and meaningful social engagement into their daily routines. Dr. K.V. Muralikrishnam Raju, Principal emphasised that students' development should extend beyond academic performance to include confidence, skills and healthy habits. The programme offered practical guidance on managing stress and maintaining a positive approach to student life, with faculty members and students actively participating in the session.

Hanuman Jayanti Observed with Traditional Rituals at Campus Temple

Banana stalks and fresh garlands framed the Abhayanjaneya Swamy idol on the 12th of May, as Hanuman Jayanti was observed with panchamrutha abhishekam, nagavalli archana with betel leaves, and sindhoor puja marking Vaisakha Dashami. Sri SRK Nishant Varma, Secretary-cum-Correspondent, joined the priests in the rituals. Director Dr. M. Jagapati Raju, Principal Dr. K.V. Muralikrishnam Raju, Vice President S.V. Rangaraju, CSE Head Dr. V.S. Ramakrishnam Raju and Chief Administrative Officer Sri Dileep Chakravarthi were among those present, alongside faculty and a large gathering of students. Chief priest Kamesh Sarma led the puja, while Bangar Raju oversaw the spiritual arrangements. The idol was elaborately decorated with banana leaves, a tree the deity is said to favour. Prasadam was later distributed to devotees, closing the morning's observance.

SRKR Plants Saplings, Urges Collective Responsibility for Environment

Calling on every citizen to plant at least one tree to protect the environment, SRKR Engineering College's NSS unit organised a sapling plantation drive on its campus on the 5th of June. Dr. M. Jagapati Raju, Director, and Dr. K.V. Muralikrishnam Raju, Principal, took part, planting saplings within the premises as part of the college's Unnat Bharat Abhiyan (UBA) cell initiative. Speaking on the occasion, they noted that reckless deforestation for firewood and farmland was destroying groundwater sources and forest habitats, while excessive fertiliser and pesticide use was harming soil health. They pointed out that a single handful of fertile soil holds nearly 8.5 lakh microorganisms, forming a food chain vital to sustaining life, and cautioned that continued soil degradation could threaten future harvests and food security. Dr. R. Krishna, UBA Coordinator, and Dr. Ch. Sri Ramulu, NSS Coordinator, also addressed the gathering, along with faculty and students from the Civil Engineering department.

Yoga Essential for Holistic Health, Says Collector

The importance of yoga in promoting physical and mental well-being was highlighted during the state-level Yoga Andhra-2026 programme organised in connection with International Yoga Day at in the College. District Collector Nagalakshmi, who participated in the programme, said regular yoga practice could contribute significantly to a healthy lifestyle and holistic development. The event featured a large-scale yoga demonstration involving students and participants from different sections of society. The programme, conducted from the 7th of June to the 21st of June, aimed to create wider awareness of the benefits of yoga and encourage people to incorporate it into their daily lives. Officials and representatives associated with the Yoga Andhra initiative participated in the programme. The demonstration at SRKREC formed part of the district-level activities organised to promote yoga and strengthen public awareness of its physical and mental health benefits.

Independence Day Observed with Discipline and Patriotism

The morning ceremony acquired a distinctly patriotic character as students and NSS cadets gathered to observe Independence Day on the 15th of August in the campus. Sri S. V. Ranga Raju, Vice President, hoisted the national flag, after which NSS volunteers presented a disciplined march past and offered their salute. Students carrying the tricolour added to the sense of occasion, while the cadets' participation reflected discipline and national pride. Addressing the gathering, Dr. M. Jagapathi Raju, Director, and Dr. K. V. Murali Krishnam Raju, Principal, called upon students to draw inspiration from the nation's freedom struggle and contribute to its progress. Faculty members, students and staff participated in the celebrations, which combined patriotic observance with a reminder of the responsibilities of the younger generation.

COLLEGE & COMMUNITY CONNECT

SRKREC Conducts Spoken English Course

A ten-day Spoken English Course, open to all, was conducted from the 4th to the 15th of May. The programme was designed to enhance proficiency in English and improve confidence in using the language effectively. Dr. K. V. Murali Krishnam Raju, Principal, and Dr. M. Jagapati Raju, Director, reviewed the arrangements for the programme and encouraged students to make effective use of the training. The course included structured sessions aimed at improving spoken English and communication abilities. Classes were conducted for two hours each day, providing students with regular opportunities to practise and develop their language skills. The initiative reflected the institution's emphasis on strengthening communication competence alongside technical education, equipping students with skills that are valuable for both higher studies and professional careers.

Yoga Promoted for Holistic Health

Promoting yoga as a means of achieving physical and mental well-being, the college organised a yoga practice session for students of Kalla Zilla Parishad High School as part of the International Yoga Day-2026 celebrations. The programme was aimed at encouraging students to incorporate yoga into their daily routines and develop healthy habits from an early age. Dr. M. Jagapathi Raju, Director, and Dr. K. V. Muralikrishnam Raju, Principal, emphasised the importance of regular yoga practice in maintaining overall health and improving concentration. A large number of school students participated in the session and practised various yoga postures under guidance. The initiative also sought to create awareness of the physical, mental and emotional benefits of yoga and encourage students to make it part of their lifestyle. The programme formed part of the college's outreach activities marking International Yoga Day.

Stitching Livelihoods — One Doll at a Time

Demonstrating their commitment to social responsibility, students of SRKR Engineering College came forward in large numbers to donate blood at a camp organised on the college premises. The initiative was aimed at supporting patients requiring blood during emergencies and encouraging young people to contribute to community welfare. The camp witnessed enthusiastic participation from students, with around 150 students donating blood, according to the organisers. Dr. K. V. Murali Krishnam Raju, Principal, appreciated the students for responding positively to the initiative and highlighted the importance of voluntary blood donation in saving lives. He encouraged students to participate in similar community-oriented activities and develop a spirit of service alongside their academic pursuits. Faculty members and college staff also supported the programme, which concluded with appreciation for the students who voluntarily contributed to the blood donation drive.

Students Led a Plastic Waste Collection Drive

A lesson in environmental responsibility took shape through action when students of Chinna Amiram Zilla Parishad High School collected 64 kilograms of plastic waste during a campus-community awareness initiative on the 14th of August. The programme sought to draw attention to the environmental impact of plastic use and encouraged students to collect discarded plastic systematically and send it for recycling. Students also received guidance on the harmful effects of plastic pollution and the need for responsible waste management. Dr. K. V. Murali Krishnam Raju, Principal, and other college representatives supported the initiative and appreciated the students' participation. The programme further encouraged schoolchildren to remain engaged in cleanliness and environmental protection activities. Prizes were announced for students who collected the highest quantities of plastic waste, with the awards scheduled for presentation on the 15th of

August. The initiative encouraged young learners to connect environmental awareness with practical community action.

KNOWLEDGE Sharing

Six-Day FDP Broadens Faculty Expertise in Emerging Technologies

The convergence of electronics, intelligent systems and quantum technologies offered faculty members a wider view of the future of engineering during a six-day Faculty Development Programme on "Emerging Trends in VLSI, IoT and Quantum Computing" held from the 11th of May to the 16th of May. The programme brought together 50 faculty members for sessions on VLSI design, IoT, automotive semiconductors, hardware security, nanotechnology and quantum computing. Dr. Ravichand, Professor, D.N.R. College of Engineering and Technology, Dr. Venkata Anuroop Theeda, Senior Principal Validation Architect/Senior Validation Manager, NXP Semiconductors, Sri T. Subramanyam, Texas Instruments, and other experts shared academic and industry perspectives. Dr. K. Bala Sindhuri, Associate Professor, ECE, and Dr. K. N. V. Satyanarayana, Assistant Professor, ECE, coordinated the programme, which strengthened faculty preparedness for teaching, research and industry engagement in emerging technologies.

Finite Element Analysis for Advanced Engineering Applications

The growing relevance of computational tools in engineering education and industrial applications was highlighted at a specialised programme on the 4th of May. The Mechanical Engineering Department organised a Short-Term Training Course on "Computational Modelling and Finite Element Analysis of Engineering Materials Using ABAQUS." The programme focused on equipping students and faculty with practical knowledge of computational modelling and finite element analysis, which are increasingly used to evaluate engineering materials and optimise product designs. Dr. K.V. Muralikrishnam Raju, Principal, and Dr. M. Jagapati Raju, Director, stressed the importance of strengthening students' exposure to advanced engineering tools. The two-day programme featured technical sessions on finite element modelling, simulation and related applications, providing participants with opportunities to develop practical skills. Faculty members and students actively participated in the training.

SRKR's Week-Long FDP on EdTech Concludes with Focus on Employability

The Faculty Development Programme on "Frontiers in EdTech: What's Next?", whose brochure Dr. K.V. Muralikrishnam Raju, Principal, had released on 8th of June, concluded on the 12th of June after a week-long run jointly conducted by College's IT department and JNTUK Kakinada's CSE department. Dr. P. Ravikiran Varma, Head of the IT Department, presided over the closing session. Dr. B. H.V.S. Ramakrishnam Raju, In-charge Principal, said that with several globally reputed companies now offering packages of up to 50 lakh a year while selecting candidates, students needed to build stronger knowledge and skills, and that such FDPs went a long way in supporting this goal. Dr. Ramesh Chandra Sharma, Senior Professor at Ambedkar University, said teaching should move beyond rote textbook learning to incorporate broader, applied knowledge for students. Dr. P. Shyamala Rao, Assistant Professor in SRKR's IT department, and Dr. A.S.N. Chakravarthy, Professor at JNTUK's CSE department, served as coordinators for the programme, which drew faculty from several engineering colleges over its run.

KNOWLEDGE Sharing

Mechanical Department to Host FDP from 29th June

The Mechanical Engineering department conducted a five-day Faculty Development Programme on "Advances in Computing Technology for Sustainable Mechanical Engineering" from the 29th of June to the 3rd of July. The programme brochure was released on the 9th of June in the Principal's chamber by Dr. M. Jagapati Raju, Director. Speaking on the occasion, Dr. Jagapati Raju and Dr. Muralikrishnam Raju, Principal said the FDP would address how emerging technologies could reduce production waste in mechanical engineering and strengthen teaching-learning methods through tools such as Artificial Intelligence and Machine Learning, helping faculty stay updated on developments relevant to the discipline. The programme was conducted jointly with JNTUK Kakinada's Mechanical Engineering department, with Dr. P. Ravivarma serving as coordinator and Dr. K. Krishna Bhaskar, Associate Professor at JNTUK, as co-coordinator. Dr. V.K. Viswanath Raj, Head of the Mechanical Department, and Dr. S. Rajesh, Dean IQAC, were among those present at the brochure release. The sessions enabled faculty members to strengthen their understanding of emerging tools and techniques, including artificial intelligence, machine learning and other digital technologies relevant to engineering education and research. Experts from academia and industry shared practical perspectives, helping participants connect technological developments with contemporary engineering challenges. The programme also encouraged faculty members to integrate innovative computing approaches into teaching, research and professional practice.

CSE Department to Host FDP on Blockchain Technologies

The Department of CSE conducted a Faculty Development Programme on Blockchain Technologies and Applications from the 29th of June to the 3rd of July, as announced by Dr. K.V. Muralikrishnam Raju, Principal. The programme brochure was released on the 15th of June in the Principal's chamber. Dr. B.H.V.S. Ramakrishnam Raju, Head of the Department of CSE, and Dr. K.V. Krishnaraju, Programme Coordinator, said the FDP would cover blockchain's role in public record transparency, adding that the technology holds significant career potential for students who acquire the skill early. They noted that teachers, too, needed to keep upgrading their skills and staying current with emerging technologies. The programme will feature both faculty and industry experts sharing insights on new developments in the field, and will be conducted online in collaboration with the Department of CSE at JNTUK Kakinada. Dr. P. Sivaramakrishna, Associate Professor at JNTUK, and Dr. K.V. Krishnaraju, Professor at SRKR, will serve as coordinators for the programme. The programme concluded as a meaningful platform for knowledge sharing, professional development and strengthening technological awareness among faculty members.

SRKR to Host FDP on Emerging Trends in Electric Vehicle Technologies

With electric vehicle adoption rising amid growing environmental concerns, the Department of Electrical and Electronics Engineering conducted a five-day Faculty Development Programme on "Emerging Trends and Challenges in Electric Vehicle Technologies" starting the 29th of June. Dr. K.V. Muralikrishnam Raju, Principal said deeper study of related technology was needed to keep pace with the shift toward EVs, and that the FDP would help meet that need, urging faculty to make good use of the opportunity. Dr. B.R.K. Varma, Head of the Department of EEE, said experts from IIT, NIT and industry would train faculty, with the programme conducted jointly with the Department of EEE at JNTUK Kakinada. Dr. G. Shyam Naresh, Programme Coordinator; and Dr. K. Ravindra, Professor at JNTUK, will coordinate the programme, with Dr. G. Kusuma, Associate Professor; and D. Anantha Koteswara Rao, Assistant Professor; serving as co-coordinators. Faculty from other colleges are also expected to take part.

From Prototypes to Scalable Startups

Ideas become meaningful when they move beyond the drawing board and address real needs in society. This perspective shaped an expert session on "Innovation, Community, and Scalable Startup Growth" held on 29th of June by the Dept. of Electronics and Communication Engineering, in association with the Institution's Innovation Council (IIC), SRKREC, under the IIC 8.0 Self-Driven Activity. Sriharsha Mallina, Co-Founder of Subha Electronics, Vishesh Country Cache, and Visakhapatnam, discussed innovation, entrepreneurship, community-driven problem solving, prototype development, technology commercialisation, and strategies for scaling startups. The session also explored the support offered by IIC in transforming innovative concepts into viable ventures. Coordinated by Dr. J. Ravi, Assistant Professor, ECE, the programme engaged 80 students and 25 faculty members, strengthening their understanding of startup ecosystems, prototype development, and scalable business models.

Engineering with Nature: Coding for Smarter Agriculture

What happens when engineering begins to respond directly to the needs of the land? This question shaped a guest lecture on "Engineering with Nature: Bridging Code and Crop with Agritech", organised by the Dept. of Computer Science and Engineering on 1st of July. Rishi Cherukuri, AgriPreneurs Community member and IT Solution Architect, Visakhapatnam, explained how engineering, software, data science, and environmental understanding could work together to develop smarter and more sustainable farming practices. He emphasised how technology could help farmers make informed decisions, improve productivity, and protect natural resources. Coordinated by Dr. K. V. Krishnam Raju, the one-and-a-half-hour session engaged B.Tech students through an interactive discussion, with nearly 30 participants recorded in the event documentation. The lecture also connected the theme with SDG 2: Zero Hunger and SDG 15: Life on Land.

Strengthening Minds, Skills and Self-Belief

Understanding oneself can be the first step towards learning more effectively and facing future challenges with greater confidence. A five-day workshop on “A Comprehensive Cognitive and Personal Development Program”, held from 28th of July to 1st of August, focused on strengthening students’ cognitive abilities, communication skills, personality, and career readiness. Mr. Yanamandra N. V. J. Rama Krishna, Consultant Clinical Psychologist, Early Interventionist, Psychometric Expert, Soft Skills Trainer, and Career Counsellor, with over 19 years of professional experience, led the sessions. Participants explored psychometric assessment, brain functioning, memory enhancement, academic strategies, self-confidence, positive thinking, communication, emotional intelligence, stress management, CBT, interview readiness, and personal action planning. Coordinated by Mrs. K. L. Divya and Mr. Y. S. Sriramam, Assistant Professors of ECE, the workshop engaged 60 students and faculty members through interactive activities, reflection, and practical learning.

Continuous Learning Key to Students' Professional Growth

The ability to keep learning, think independently and apply knowledge to practical challenges will determine the professional success of young engineers, said Sri Chalamuri Ravishankar, Director Central Government Road Safety Institute. Addressing an international seminar organised in the College on 7th of August, he urged students to look beyond conventional classroom learning and develop a habit of continuous knowledge acquisition. He emphasised that students should actively explore emerging technologies, strengthen their practical skills and convert innovative ideas into solutions for real-world problems. The seminar provided a platform for students to interact with experts and gain exposure to contemporary developments in their fields. Dr. M. Jagapathi Raju, Director, and Dr. K. V. Murali Krishnam Raju, Principal, along with faculty members and students, participated in the programme. The organisers noted that such expert-led academic initiatives help students broaden their perspectives, strengthen professional competencies and prepare themselves for evolving career opportunities.

Future Skills Prime Programme to Equip Youth with Industry-Ready Skills

As technology continues to reshape career opportunities, young people were encouraged to acquire future-oriented skills through the Future Skills Prime programme, whose poster was released on the 4th of August. Sri K. S. Prabhakar Rao, CEO, SETWEL, said the programme, implemented in collaboration with NASSCOM, aimed to provide training to one lakh youth across Andhra Pradesh. The initiative offered eight future-focused courses, with each participant eligible to enrol in up to three courses, while the State Government would bear the training costs and provide industry-recognised certifications. Dr. M. Jagapathi Raju, Director, and Dr. K. V. Murali Krishnam Raju, Principal, highlighted the programme’s potential to strengthen students’ employability and prepare them for emerging career opportunities. Dr. P. Ravi Kiran Varma, Head, IT Department and Dean, Training and Capacity Development, along with SETWEL officials, faculty members and students, attended the programme.

Youth Urged to Promote National Unity Through Service

Addressing an NSS programme at SRKR Engineering College on the 8th of August, Sri Saida Ramavath, NSS Regional Coordinator, Ministry of Youth Affairs and Sports said that the spirit of national unity can be strengthened when young people actively engage in community service and social initiatives. She encouraged students to participate in activities that promote national integration, social responsibility and community welfare. She also highlighted the role of NSS in developing leadership, discipline and a spirit of service among youth. The programme also featured awareness activities and a tree plantation initiative, encouraging students to contribute to environmental protection. Dr. M. Jagapathi Raju, Director; Dr. K. V. Murali Krishnam Raju, Principal, and Dr. Dileep Chakravarthi, Chief Administrative Officer, appreciated the initiative and encouraged students to participate actively in social-service programmes. Faculty members and students also took part in the programme.

Emerging Energy Technologies Gain Focus at SRKREC

Research in emerging energy technologies received attention through two EEE Department initiatives, with discussions centring on electric mobility, sustainable energy and advanced technological applications. A technical programme on electric vehicles examined their potential to reduce pollution and encouraged students to understand the technologies shaping future transportation. This was followed by a Faculty Development Programme on sustainable energy solutions, where experts discussed electric-vehicle and hydrogen-related technologies and urged faculty members to pursue interdisciplinary research. Dr. K. V. Murali Krishnam Raju, Principal, stressed the value of collaborative research in developing practical solutions to contemporary challenges, while faculty members and participants explored new opportunities for academic and applied research. Together, the programmes provided students and faculty with exposure to rapidly evolving energy technologies and reinforced the importance of research, innovation and sustainability in engineering.

Charting Career Paths Beyond Engineering

Choosing a career after engineering requires more than academic knowledge; it calls for awareness of emerging opportunities and a clear understanding of one's strengths. The Dept. of Computer Science and Engineering organised an awareness workshop on "Career Opportunities after Engineering" on 17th of August for B.Tech students. Mr. S. Mani Mohan Trinath, Senior Faculty at ACE Engineering Academy, Patented Innovator, and Distinguished Fellow Member (DFM), shared insights into higher education, entrepreneurship, emerging technologies, and professional pathways. He discussed career possibilities in Artificial Intelligence, Data Science, Cyber Security, Cloud Computing, and IoT, while also addressing skill development, internships, certifications, career planning, and placement preparation. The interactive session engaged nearly 80 students, encouraging them to assess their interests and make informed career decisions.

KNOWLEDGE Sharing

Early Detection Can Help Prevent Tuberculosis, Experts Say

Tuberculosis can often be brought under control when symptoms are identified early and appropriate treatment is initiated, medical experts told students at an awareness programme organised in the college on the 27th of August. The programme was conducted through the college's NSS activities to create awareness about tuberculosis, its early detection and preventive measures. Addressing the gathering, health experts advised students to remain alert to symptoms and seek medical attention without delay. They explained the importance of timely diagnosis, proper treatment and preventive practices in reducing the spread of the disease. Dr. K. V. Murali Krishnam Raju, Principal, emphasised the need for students to develop health awareness and share reliable information within their communities. Faculty members and students participated in the programme, which sought to strengthen awareness about tuberculosis and encourage responsible health practices among young people.

Experts Call for Products from Recycled Waste

Young engineers must turn their research toward reusing waste materials, Dr. Pavan Kumar Penumaka, Professor at BITS Pilani Hyderabad, said at a two-day national-level training camp on "Sustainable Waste Recycling, Value-Added Products Preparation" held on the 29th of August. Prof. Dr. Mohan Kumar Subramaniam, Chennai Institute of Technology, explained the importance of developing recycling technologies that can convert discarded materials into useful products and reduce environmental damage. He discussed the growing need for sustainable approaches to waste management and encouraged students and researchers to explore practical solutions. Dr. M. Jagapathi Raju, Director; and Dr. K. V. Murali Krishnam Raju, Principal, encouraged students to pursue research in emerging areas of sustainable engineering. Faculty members and students participated in the programme, which focused on linking technological innovation with environmental responsibility.

Young Engineers Urged to Research Waste Reuse

Discarded materials can become valuable resources when engineering research is directed towards reuse and recovery, experts observed at a programme conducted on the 28th of August. Prof. Dr. Pavan Kumar Penumakala, BITS Pilani, advised young engineers to undertake research on waste reuse and develop technologies that can serve environmental and social needs. He noted that the Central Government was extending financial support of up to 500 crores for research and innovation, creating opportunities for students and researchers to pursue practical projects. Dr. M. Jagapathi Raju, Director; and Dr. K. V. Murali Krishnam Raju, Principal, supported the initiative and encouraged students to explore research opportunities. The programme focused on sustainable waste management, innovation and the conversion of waste into useful applications.

SRKR Sets Up Buttermilk Stall To Beat Summer Heat

With summer temperatures climbing, SRKR Engineering College set up a buttermilk distribution centre near its main gate on the 23rd of May, aimed at offering relief to the public, passersby and commuters. Director Dr. M. Jagapati Raju and Principal Dr. K.V. Muralikrishnam Raju inaugurated the initiative. Speaking on the occasion, engineer Rambabu noted that the centre was set up keeping in mind the growing heat-related distress faced daily by residents, pedestrians and vehicle users, and urged the public to make good use of the facility during the summer months. Several people commended the college management for the service. The stall will continue to serve buttermilk through the summer season.

SRKR IT Department to Host FDP on Frontiers in EdTech

The Department of IT, in collaboration with JNTUK Kakinada's CSE department, conducted a five-day Faculty Development Programme titled "Frontiers in EdTech: What's Next?" from the 8th to the 12th of June, examining emerging changes, limitations and future innovations in educational technology. Dr. K.V. Muralikrishnam Raju, Principal, released the programme poster on the 2nd of June. Dr. P. Ravikiran Varma, Head of the IT Department, and Dr. P. Shyamala Rao, FDP Coordinator, said the online programme would bring together faculty, students and industry experts from across the country to discuss new dimensions in teaching, incorporating recent technological and R&D developments into classroom instruction. Teaching staff from all engineering disciplines are welcome to join, including faculty from other colleges. Dr. A.S.N. Chakravarthy, CSE Professor at JNTUK, will serve as co-coordinator for the programme.

SRKREC Students Join Cybercrime Awareness Rally

Raising awareness about cybercrime and online fraud, students of SRKR Engineering College participated in a cybercrime awareness rally organised on the 9th of July. The programme was conducted to educate the public, particularly young people, about emerging cyber threats and the precautions required to safeguard themselves against online fraud. The rally highlighted the importance of responsible digital practices, including protecting personal information, exercising caution while making online transactions and reporting suspicious activities to the appropriate authorities. District officials, police personnel, banking representatives, college representatives and students participated in the awareness campaign. The initiative emphasised the need for collective efforts to strengthen digital safety and equip young people with the knowledge required to identify and prevent cybercrime.

Graduation Marks a New Beginning for Young Engineers

A new chapter began for the graduating students of SRKR Engineering College as they were encouraged to transform their academic knowledge into professional competence and contribute meaningfully to society. Addressing the Graduation Day programme held on the 19th of July, CRDA Additional Commissioner Sri Rahul Kumar Reddy urged the young engineers to continuously update their technical knowledge, develop professional skills and remain adaptable to the rapidly changing demands of the technology sector. The programme was organised as part of the birth anniversary celebrations of the college's founder, late Sagi Ramakrishnam Raju. Sri SRK Nishanth Varma, Secretary & Correspondent, said the three-day celebrations featured several programmes, including the West Godavari district badminton selection tournament and a blood donation camp. Degrees were presented to students who successfully completed their courses during the previous academic year. Emphasising the importance of continuous learning, Sri Rahul Kumar Reddy advised the graduates to set clear goals, strengthen their capabilities and use their expertise for the benefit of society. Dr. M. Jagapathi Raju, Director, Dr. K. V. Murali Krishnam Raju, Principal, and Sri Dileep Chakravarthi, Chief Administrative Officer, along with faculty members and others, participated in the programme.

Stimulations

Innovation Can Turn Student Ideas into Successful Startups

Turning a creative idea into a practical solution can be the first step towards building a successful entrepreneurial venture, students were told at Srishti 2026, an innovation-focused programme. The programme encouraged students to move beyond conventional approaches, identify real-world problems and develop innovative solutions that could eventually be transformed into products and startups. Addressing the gathering, Sri SRK Nishanth Varma, Secretary & Correspondent, emphasised the importance of nurturing an entrepreneurial mindset among young engineers and making effective use of the opportunities available on campus. The event was organised jointly by the college's incubation and entrepreneurship initiatives to provide students with a platform to present and develop their ideas. Dr. K. V. Murali Krishnam Raju, Principal, stressed the need to encourage students to take their innovations beyond the idea stage and work towards practical implementation. The college has been providing infrastructure, mentoring and technical support to help students develop their entrepreneurial concepts. Faculty members and students participated in the programme, which highlighted innovation, problem-solving, entrepreneurship and self-employment as important pathways for young engineers.

SRKR Students and Faculty Excel in IIT Madras NPTEL Courses

Academic excellence and continuous learning have earned students and faculty members of SRKR Engineering College significant recognition in the NPTEL online courses conducted by IIT Madras. In the January–April 2026 session, 763 participants enrolled in the courses, of whom 625 successfully secured certificates, including 26 Gold, 205 Silver, 245 Elite and 146 course-completion certificates. Sixteen participants were also recognised as toppers, while seven faculty members received special recognition for their performance. Sri SRK Nishanth Varma, Secretary & Correspondent, congratulated the achievers and appreciated the faculty members for pursuing continuous professional development. Dr. K. V. Murali Krishnam Raju, Principal, and Dr. N. Gopalakrishna Murthy, NPTEL Local Centre Coordinator, noted that SRKR students and faculty have consistently performed well in the MOOCs conducted under IIT Madras over the past decade. Dr. M. Jagapathi Raju, Director, stated that students and faculty of the college had collectively earned 12,388 NPTEL certificates between 2016 and 2026, describing the achievement as a reflection of the institution's commitment to academic excellence.

Film Pre-Release Event Brings Choreographer Sri Kanakaraju to SRKREC

The world of cinema offered students a glimpse into its creative process when choreographer Kanakaraju attended a film pre-release event on the campus on the 4th of August. The programme provided students with an opportunity to experience the excitement surrounding the upcoming film and gain insights into the work involved in the entertainment industry. Sri SRK Nishanth Varma, Secretary & Correspondent, and Dr. K. V. Murali Krishnam Raju, Principal, were associated with the programme and encouraged students to make use of opportunities that broaden their exposure beyond the classroom. Sri Kanakaraju interacted with the gathering and shared his association with the film and its production. The event also featured the presence of film personalities and college representatives, creating an engaging interface between the students and the creative industry. Faculty members and students participated in the programme, which added a cultural and professional dimension to campus activities.

Stimulations

Vande Mataram Inspired Patriotism Among Students

A familiar national song took on renewed significance when a programme marking the 150th anniversary of Vande Mataram was conducted on the 11th of August in the campus. Addressing the gathering, Sri Kanumuri Raghu Ramakrishnam Raju, Deputy Speaker, Andhra Pradesh Legislative Assembly, said the song continued to inspire patriotism and strengthen national consciousness among citizens. The programme was organised as part of the commemorative activities associated with Vande Mataram, with students participating in patriotic events and awareness activities. Dr. K. V. Murali Krishnam Raju, Principal, and other college representatives were present on the occasion. The observance provided students an opportunity to reflect on the historical and emotional significance of the national song while reaffirming their connection with the values of patriotism, unity and national responsibility.

"Sahachitra Bandham" Team Connects with SRKREC Students

For students accustomed to classrooms and laboratories, an encounter with a film crew offered a glimpse into the creative world of cinema. The team of the upcoming film "Sahachitra Bandham" visited the college on the 14th of August and interacted with students at the college. The hero of the movie, Mr. Kumar, and the heroine Ms. Shwetha spoke about selected scenes from the movie, while the director Teja appealed to audiences to support the film being made with a fresh storyline and new actors. He also shared details about the production and creative process behind the project. The interaction gave students an opportunity to engage with members of the film industry and learn more about the making of a feature film. The programme was attended by Dr. M. Jagapathi Raju, Director, along with other college representatives.

Coding Competition Scheduled at SRKR Engineering College

Engineering students were given an opportunity to test their programming abilities through a coding competition announced by the college, with the online phase scheduled from the 22nd of August. The competition was organised by the Department of IT and was to be conducted in two stages, with an online component followed by an offline round on the 12th of September. The initiative was designed to provide students from different engineering disciplines with a platform to demonstrate their coding skills and problem-solving abilities. Dr. K. V. Murali Krishnam Raju, Principal, said such competitions could encourage students to strengthen their technical capabilities through practical challenges. Dr. P. Ravi Kiran Varma, Head, IT Department, and other faculty members were associated with the initiative. Students were encouraged to participate and make use of the opportunity to develop their programming skills.

Sports & Games

Month-Long Summer Sports Camp Builds Fitness and Focus in Young Athletes

A month-long summer sports coaching camp at SRKR Engineering College came to a close on the 23rd of May, having drawn school-going children eager to build physical strength and sporting skill during their holidays. Dr. M. Jagapati Raju, Director and Dr. K.V. Muralikrishnam Raju, Principal said the camp was designed to nurture mental development alongside physical fitness and interest in athletics among young students. Dr. P. Satyanarayana Raju, Physical Director presided over the closing programme, where parents too spoke about the value of channelling children's summer break into structured training rather than idle time, noting that consistent coaching in an area of genuine interest yields good results. The coach who trained the students through the month was felicitated on the occasion, and certificates were distributed to all participating students. PED Dr. C. Hari Mohan, Assistant Physical Director V. Avinash and others were present at the event.

Young Badminton Talent Showcased at SRKREC

Badminton talent from across West Godavari came together in the college for the Sagi Ramakrishna Raju Memorial West Godavari District Badminton Selection Championship 2026, conducted from the 17th of July to the 19th of July. Organised by the District Badminton Association, the event featured championship matches and selection trials across various age groups, attracting more than 460 players, including participants in the Under-11 to Under-19 and veteran categories. Sri SRK Nishanth Varma, Secretary & Correspondent, reiterated SRKREC's commitment to promoting sports and providing opportunities for young talent. Dr. M. Jagapathi Raju, Director, and Dr. K. V. Murali Krishnam Raju, Principal, also attended the programme. Sri K Kalpashree, Joint Collector, West Godavari, encouraged students to participate actively in sports to manage stress and develop discipline, while Sri T. Rahul Kumar Reddy, Additional Commissioner, urged parents to support children interested in sports. The championship highlighted the importance of identifying and nurturing sporting talent through sustained institutional, community and parental support.

SRKREC STUDENT SELECTED FOR STATE-LEVEL ATHLETICS COMPETITIONS

A promising sporting achievement brought recognition to SRKR Engineering College as a student secured selection for the state-level athletics competitions. Mohammed Abdul Afif, a second-year Cyber Security student, was selected after participating in the district-level athletics meet held in Tanuku on the 26th of July. He qualified in the 200-metre and 400-metre events and earned the opportunity to represent the district at the state-level competition held in Tirupati from 11th to 13th of August. Dr. K. V. Murali Krishnam Raju, Principal, and Dr. M. Jagapathi Raju, Director, congratulated the student on his achievement and encouraged him to pursue excellence in sports alongside academics. The college appreciated his performance and wished him success in the upcoming state-level competitions.

Students Should Excel in Sports Alongside Academics

A strong focus on sports and physical development was urged for students as the Amaravati Championship 2026 district-level competitions for West Godavari were inaugurated at SRKR Engineering College on 10th of August, 2026. Sri Pulaparathi Anjibabu, Chairman of the State Public Accounts Committee and MLA Bhimavaram, called upon students to pursue excellence in sports alongside their education and make effective use of the opportunities provided by the government. Dr. K. V. Murali Krishnam Raju, Principal, presided over the programme. Sri Nagashree, District Collector, also highlighted the importance of encouraging youth participation in sports. The competitions featured participation across several sporting categories, with athletes competing in different events. Sri P. Ravindranath, Director Sports Authority of Andhra Pradesh, and other officials, faculty members and students participated in the inaugural programme.

Sportsmanship Takes Centre Stage on National Sports Day

Sporting spirit found expression through a rally and felicitation programme held on 29th of August to mark National Sports Day under the aegis of the Dept. of Physical Education. Students carrying national flags participated in a rally across the campus after paying floral tributes to hockey legend Dhyan Chand. Addressing the gathering, Dr. M. Jagapathi Raju, Director, and Dr. K. V. Murali Krishnam Raju, Principal, stated that sporting discipline could help students grow into responsible citizens, accomplished learners and individuals who could make the nation proud. The occasion also recognised sporting achievement, with college management felicitating Sri Ramraju for securing medals for Andhra Pradesh at national-level volleyball competitions. Faculty members and NSS coordinators Sri C. H. Harimohan, Dr. B. Satyanarayana Raju, Smt. G. Sarika, Sri V. Avinash, Sri G. Lohith, Sri K. N. V. Satyanarayana and Sri R. Krishna Chaitanya participated.
